1. PROJECT OVERVIEW

Punnaigai Finances is a centralized financial management system designed to manage the complete financial operations of a finance business.

The system manages:

- Customer registration
- Customer documents and proofs
- Loan packages
- Loan applications
- Loan disbursement
- Customer repayments
- Agent collections
- Overdue payments
- Loan penalties
- Investor investments
- Investor periodic payments
- Investor wallets
- Investor withdrawals
- Partner contributions
- Partner earnings
- Partner wallets
- Partner withdrawals
- Income
- Expenses
- Financial transactions
- Business reports

The project consists of two major platforms:

1. Admin Web Panel

The Admin manages and monitors the complete business operation.

2. Role-Based Mobile Application

A single mobile application supports multiple user roles. Each user sees screens and information based on their assigned role.

The mobile roles are:

- Customer
- Agent
- Investor
- Partner

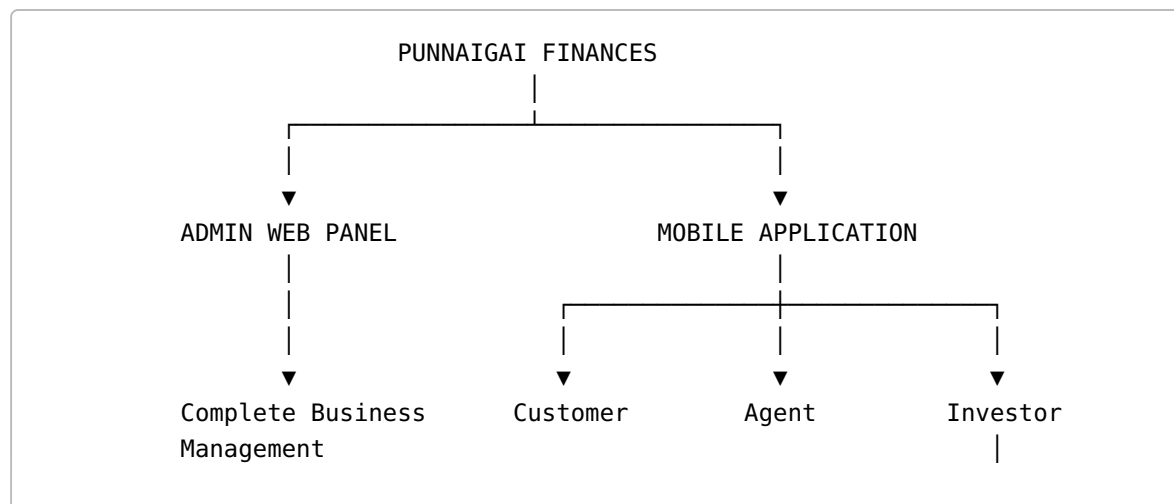

2. PROJECT OBJECTIVES

The main objective of Punnaigai Finances is to create a transparent and centralized system for managing money entering and leaving the business.

The system should:

- Manage customer loans from application to completion.
- Store customer documents and supporting proofs.
- Track every customer payment.
- Allow Agents to record customer collections.
- Automatically identify overdue payments.
- Apply configurable penalties.
- Manage investments received from Investors.
- Record payments made to Investors.
- Maintain individual Investor wallets.
- Manage Partner contributions.
- Calculate and record Partner earnings.
- Maintain individual Partner wallets.
- Manage wallet withdrawals.
- Record company income and expenses.
- Maintain a complete transaction history.
- Provide accurate financial reports.

3. SYSTEM ARCHITECTURE

4. USER ROLES

4.1 Admin

The Admin has complete control over the system.

The Admin manages:

- Customers
 - Customer documents
 - Loans
 - Loan packages
 - Collections
 - Penalties
 - Agents
 - Investors
 - Partners
 - Investor wallets
 - Partner wallets
 - Withdrawals
 - Income
 - Expenses
 - Transactions
 - Reports
-

4.2 Customer

A Customer receives a loan from Punnaigai Finances.

The Customer can:

- View loan details.
 - View the actual amount received.
 - View payment schedules.
 - View payment history.
 - View pending amounts.
 - View overdue amounts.
 - View penalty information.
 - View and upload required documents.
 - View notifications.
 - Manage their profile.
-

4.3 Agent

An Agent manages customer collections.

The Agent can:

- View assigned customers.
 - View customer loan information.
 - View pending amounts.
 - Record customer collections.
 - View collection history.
 - View daily and monthly collection summaries.
-

4.4 Investor

An Investor provides an investment amount to Punnaigai Finances.

The Investor can:

- View investment details.
 - View periodic payments.
 - View wallet credits.
 - View wallet balance.
 - Request withdrawals.
 - View withdrawal history.
 - View investment-related documents.
-

4.5 Partner

A Partner participates in the business based on a partnership agreement.

The Partner can:

- View partnership details.
 - View contribution history.
 - View business earnings.
 - View wallet credits.
 - Request withdrawals.
 - View withdrawal history.
 - View partnership documents.
-

5. OVERALL FINANCIAL CONCEPT

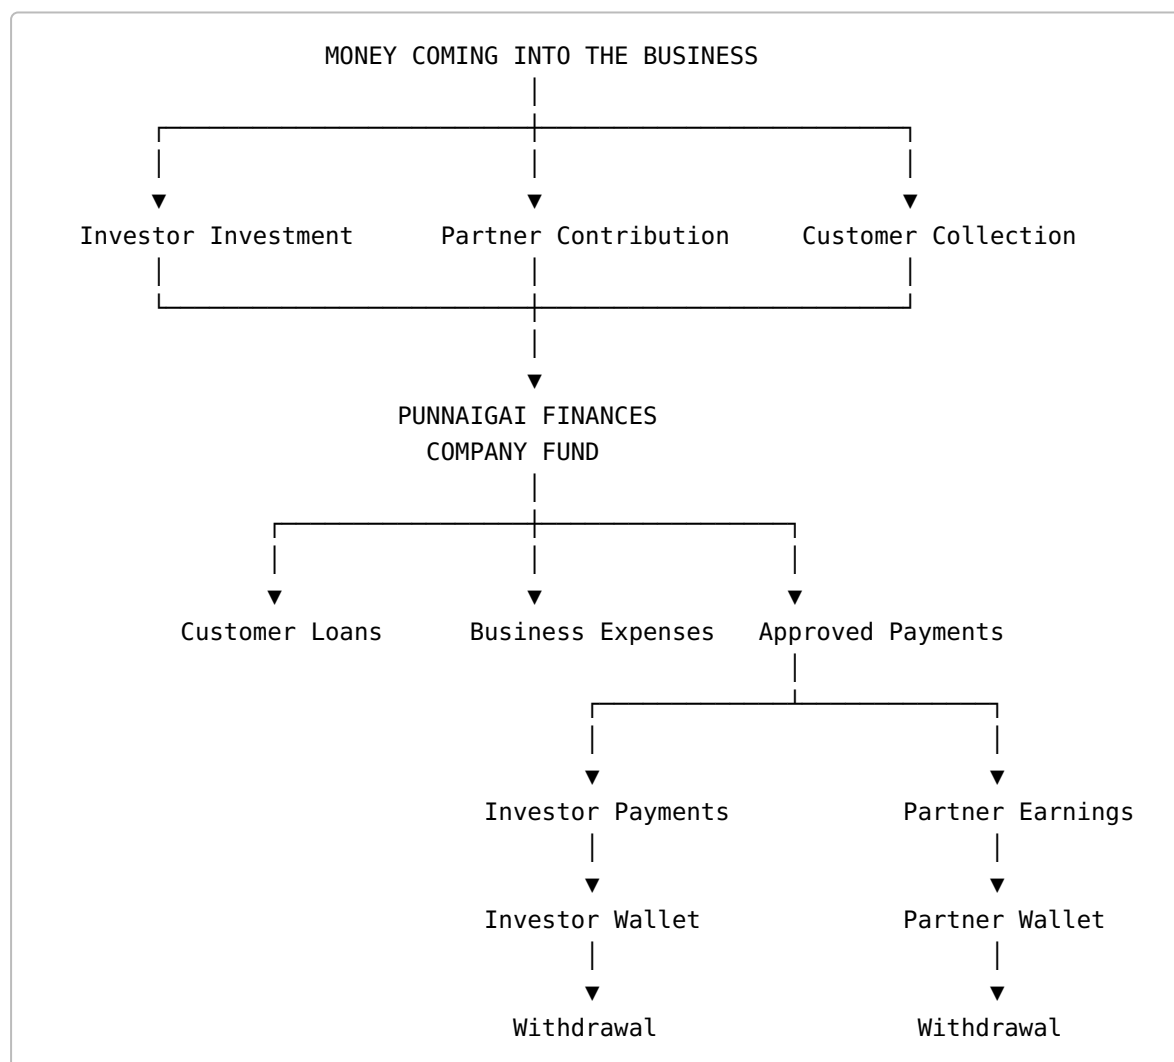

The complete project is based on the movement of money.

There are three major areas:

1. COMPANY INCOMING MONEY
2. COMPANY OUTGOING MONEY
3. INDIVIDUAL WALLET MONEY

These financial areas must be maintained separately.

6. COMPLETE COMPANY FINANCIAL FLOW

7. COMPANY INCOMING MONEY

Company incoming money means money entering the business.

7.1 Investor Investment

Example:

```
Investor Ravi
  |
  | ₹5,00,000 Investment
  ▼
Punnaigai Finances
```

This is recorded as an Investor Investment transaction.

7.2 Partner Contribution

Example:

```
Partner Arun
  |
  | ₹5,00,000 Contribution
  ▼
Punnaigai Finances
```

If there are two Partners:

```
Partner Arun      → ₹5,00,000
Partner Kumar     → ₹5,00,000

Total Contribution = ₹10,00,000
```

7.3 Customer Collection

Customers repay their loan amounts.

```
Customer
  |
  | Loan Repayment
  ▼
Agent / Admin
  |
  ▼
Punnaigai Finances
```

7.4 Other Business Income

Other income may include:

- Processing charges
 - Service charges
 - Other approved income
-

8. COMPANY OUTGOING MONEY

Company outgoing money means money leaving the business.

Main Outgoing Transactions

- Customer loan disbursement
 - Business expenses
 - Investor payments
 - Partner earnings
 - Approved withdrawal payments
-

8.1 Customer Loan Disbursement

Example:

Loan Package Amount: ₹1,00,000

Actual Amount Given to Customer: ₹88,000

Flow:

Punnaigai Finances
|
| ₹88,000
▼
Customer

The actual amount disbursed must be recorded clearly.

8.2 Business Expenses

Examples:

- Office rent
 - Salaries
 - Travel expenses
 - Maintenance
 - Other approved expenses
-

9. CUSTOMER MANAGEMENT

Customer Module Structure

```
CUSTOMER
|
├── Customer List
├── Add Customer
├── Customer Details
│   ├── Personal Information
│   ├── Documents
│   ├── Loan Details
│   ├── Payment Schedule
│   ├── Payment History
│   ├── Pending Amount
│   ├── Overdue Details
│   └── Penalty History
└── Customer Reports
```

10. CUSTOMER DOCUMENT MANAGEMENT

The system should allow customer documents to be uploaded and verified.

Possible Documents

- Identity Proof
- Address Proof
- Income Proof
- Employment Proof
- Property Documents
- Asset Documents
- Guarantor Documents
- Other Required Documents

Document Information

Each document should contain:

- Document Category
- Document Name
- Attachment
- Upload Date
- Verification Status
- Admin Remarks

Document Status

Pending
Verified
Rejected
Additional Document Required

11. LOAN PACKAGE MANAGEMENT

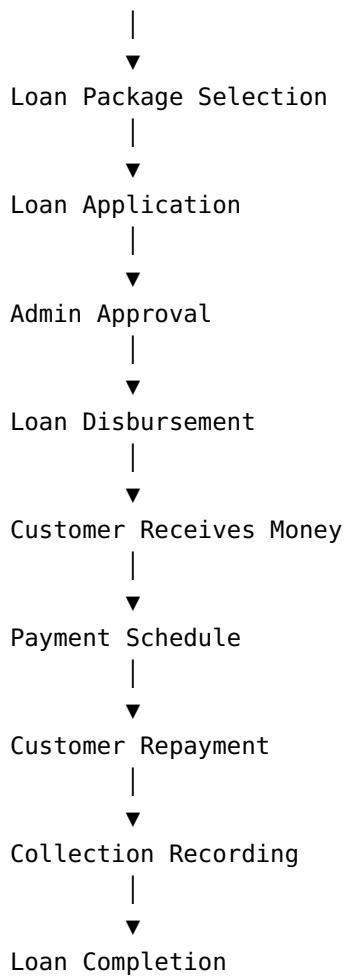

The Admin creates different loan packages.

Loan Package Fields

- Package Name
- Package Amount
- Actual Disbursement Amount
- Repayment Duration
- Payment Frequency
- Total Repayment Amount
- Applicable Charges
- Grace Period
- Penalty Configuration
- Package Status

12. CUSTOMER LOAN FLOW

```
graph TD; A[Customer Registration] --> B[Document Upload]; B --> C[Document Verification];
```

13. COLLECTION MANAGEMENT

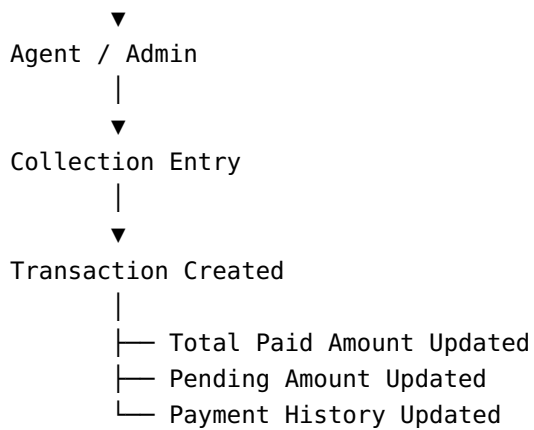

Collections may be recorded by the Agent or Admin.

Collection Details

- Customer Name
- Loan Reference
- Collection Amount
- Collection Date
- Payment Method
- Transaction Reference
- Collected By
- Remarks

Collection Flow

Customer Payment
|

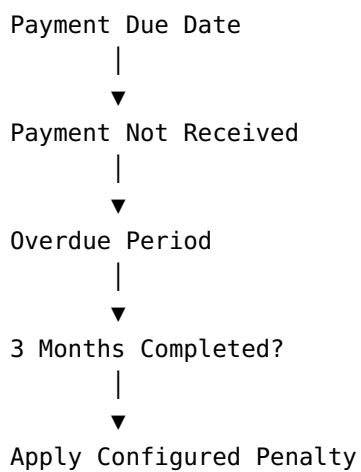

14. OVERDUE AND PENALTY MANAGEMENT

The system should identify overdue payments.

Example

If a customer does not pay for three months:

Example:

Pending Amount: ₹20,000
Penalty: ₹1,000

Total Payable: ₹21,000

The Admin should be able to configure:

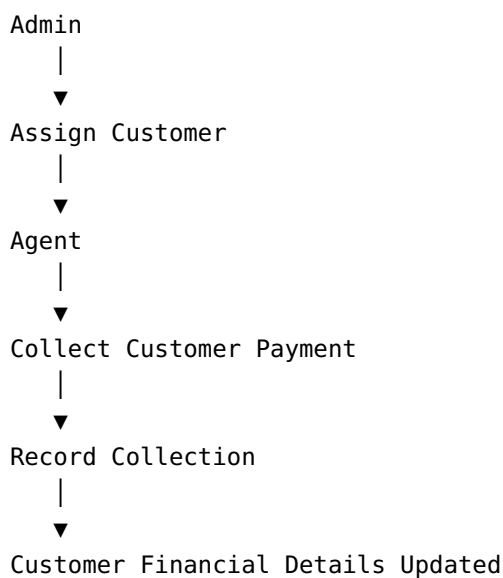

- Penalty enable/disable

- Grace period
 - Fixed amount or percentage
 - Penalty frequency
 - Maximum penalty amount
-

15. AGENT MANAGEMENT

The Admin assigns customers to Agents.

Agent Flow

16. INVESTOR MANAGEMENT

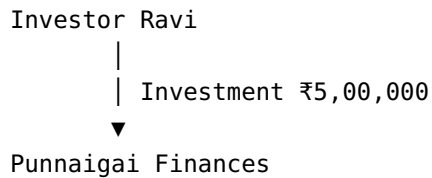

Investor information should contain:

- Personal details
 - Investment details
 - Investment agreement
 - Investment amount
 - Payment history
 - Wallet
 - Withdrawal history
 - Supporting documents
-

17. INVESTOR FINANCIAL FLOW

The Investor gives an investment amount to Punnaigai Finances.

Example:

Important:

Investment Amount $\neq$ Investor Wallet Balance

Example:

Original Investment: ₹5,00,000

Initial Wallet Balance: ₹0

The original investment and wallet must be stored separately.

18. INVESTOR WALLET

18.1 Wallet Incoming

The Investor Wallet receives periodic payments according to the investment agreement.

Example:

January

Monthly Payment: + ₹10,000

Wallet Balance: ₹10,000

February

Monthly Payment: + ₹10,000

Wallet Balance: ₹20,000

March

Monthly Payment: + ₹10,000
Wallet Balance: ₹30,000

Investor Wallet Incoming Flow

```
graph TD; A[Punnaigai Finances] --> B[Approved Investor Payment]; B --> C[Wallet Credit Transaction]; C --> D[Investor Wallet];
```

18.2 Investor Wallet Outgoing

When the Investor wants to withdraw money:

```
graph TD; A[Investor Wallet] --> B[Withdrawal Request]; B --> C[Admin Review]; C --> D[Approved]; D --> E[Money Paid]; E --> F[Wallet Debit Transaction];
```

Example:

Wallet Balance: ₹30,000

Withdrawal: ₹15,000

Remaining Balance: ₹15,000

18.3 Investor Wallet Formula

Available Wallet Balance

=

Total Wallet Credits

-

Completed Withdrawals

19. PARTNERSHIP MANAGEMENT

The Partnership Module manages Partners and their financial relationship with Punnaigai Finances.

Partner information includes:

- Partner details
- Partnership agreement
- Contribution amount
- Contribution history
- Earnings
- Wallet
- Withdrawal history
- Supporting documents

20. PARTNER FINANCIAL FLOW

Example:

Partner Arun
|
| Contribution ₹5,00,000
▼
Punnaigai Finances

The Partner contribution must be separate from the Partner Wallet.

Partner Contribution $\neq$ Partner Earnings $\neq$ Partner Wallet Balance

21. PARTNER WALLET

21.1 Partner Wallet Incoming

Partner earnings are credited to the Partner Wallet.

Example:

January

Partner Earnings: + ₹25,000

February

Partner Earnings: + ₹30,000

Wallet balance:

January Earnings: ₹25,000

February Earnings: ₹30,000

Total Balance: ₹55,000

Partner Wallet Incoming Flow

Business Earnings

Earnings Calculation

Admin Approval

Partner Wallet Credit

21.2 Partner Wallet Outgoing

Example:

Wallet Balance: ₹55,000

Withdrawal: ₹20,000

Remaining Balance: ₹35,000

Flow:

Partner Wallet
↓
Withdrawal Request
↓
Admin Approval
↓
Payment Completed
↓
Wallet Debit

21.3 Partner Wallet Formula

Available Partner Wallet Balance

=

Approved Earnings

+

Other Approved Wallet Credits

-

Completed Withdrawals

22. INVESTOR AND PARTNER DIFFERENCE

Investor	Partner
Provides an investment	Participates in the business
Investment Agreement	Partnership Agreement
Investment amount is recorded	Contribution amount is recorded
Receives agreed periodic payments	Receives agreed business earnings
Has an Investor Wallet	Has a Partner Wallet
Can request wallet withdrawal	Can request wallet withdrawal

23. INCOME MANAGEMENT

The Income Module records money received as business income.

Income Fields

- Income Category
- Amount
- Date
- Description
- Payment Method
- Reference Number
- Supporting Attachment

24. EXPENSE MANAGEMENT

The Expense Module records money spent by the business.

Expense Categories

- Office Expenses
- Salary
- Travel
- Maintenance
- Agent Expenses
- Other Expenses

25. WITHDRAWAL MANAGEMENT

Withdrawals are applicable to:

- Investors
- Partners

Withdrawal Status

Pending
Approved
Rejected
Completed

The wallet should only be debited after the withdrawal is successfully completed.

26. TRANSACTION MANAGEMENT

Every financial activity should create a transaction record.

Transaction Types

- Investor Investment
- Partner Contribution
- Customer Loan Disbursement
- Customer Collection
- Penalty
- Investor Wallet Credit
- Investor Withdrawal
- Partner Wallet Credit
- Partner Withdrawal
- Income
- Expense

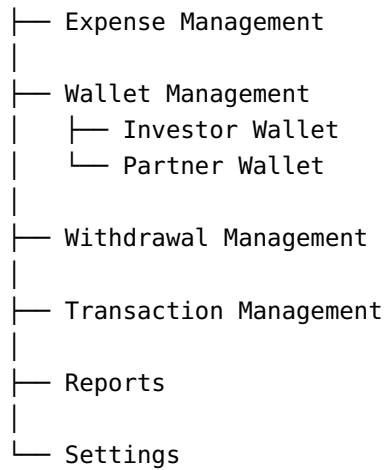

Transaction Fields

- Transaction ID
- User
- User Role
- Transaction Type
- Credit or Debit
- Amount
- Date
- Reference Number
- Description
- Status

27. ADMIN PANEL – COMPLETE STRUCTURE

ADMIN PANEL

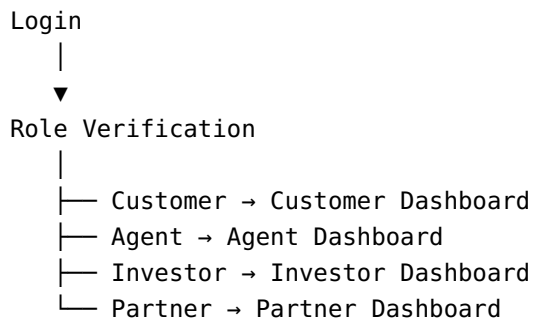

- └─ Dashboard
- └─ Customer Management
 - └─ Customer List
 - └─ Add Customer
 - └─ Customer Details
 - └─ Customer Documents
 - └─ Loan Details
 - └─ Payment Schedule
 - └─ Payment History

- └─ Income Management

28. ROLE-BASED MOBILE APPLICATION

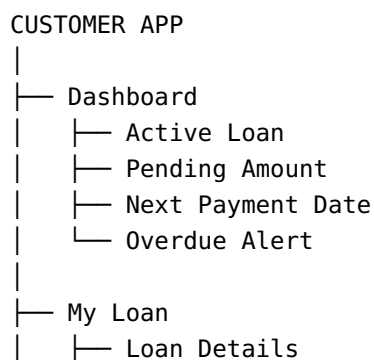

The application uses a single login system.

After successful login:

Each role can only access its authorized screens.

29. CUSTOMER MOBILE APP SCREENS

33. ROLE-BASED NAVIGATION STRUCTURE

The recommended React Native architecture is:

```
App
├── AuthNavigator
├── RoleBasedNavigator
│   ├── CustomerNavigator
│   ├── AgentNavigator
│   ├── InvestorNavigator
│   └── PartnerNavigator
```

34. REPORTS

The Admin should have access to:

- Customer Report
- Loan Report
- Collection Report
- Pending Payment Report
- Overdue Report
- Penalty Report
- Agent Collection Report
- Investor Report
- Investor Wallet Report
- Partner Contribution Report
- Partner Earnings Report
- Partner Wallet Report
- Income Report
- Expense Report
- Withdrawal Report
- Complete Transaction Report

Reports should support:

- Daily filter
- Monthly filter
- Yearly filter
- Custom date filter

35. IMPORTANT BUSINESS RULES

Rule 1: Company Fund and Individual Wallet Must Be Separate

Company money should not be directly confused with Investor or Partner wallet money.

Rule 2: Investment Amount and Wallet Balance Must Be Separate

Investment Amount $\neq$ Wallet Balance

Rule 3: Partner Contribution and Earnings Must Be Separate

Partner Contribution $\neq$ Partner Earnings $\neq$ Wallet Balance

Rule 4: Every Wallet Credit Must Have a Transaction

A wallet balance should never be manually increased without a transaction record.

Rule 5: Every Withdrawal Must Have a Transaction

A completed withdrawal must create a debit transaction.

Rule 6: Wallet Balance Cannot Become Negative

Users cannot withdraw more than their available balance.

Rule 7: Customer Documents Must Be Traceable

Every document must have an attachment and verification status.

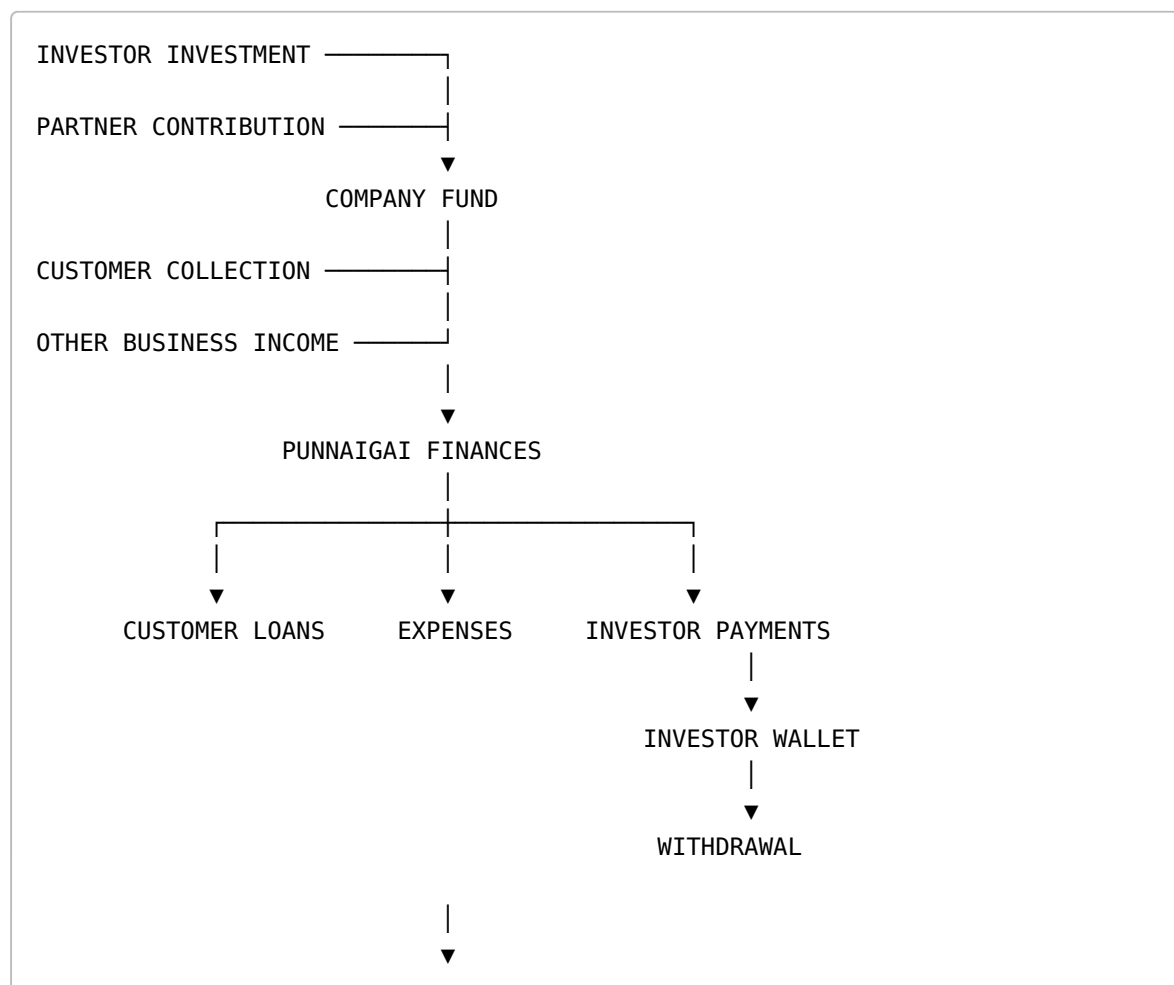

Rule 8: Penalties Must Be Configurable

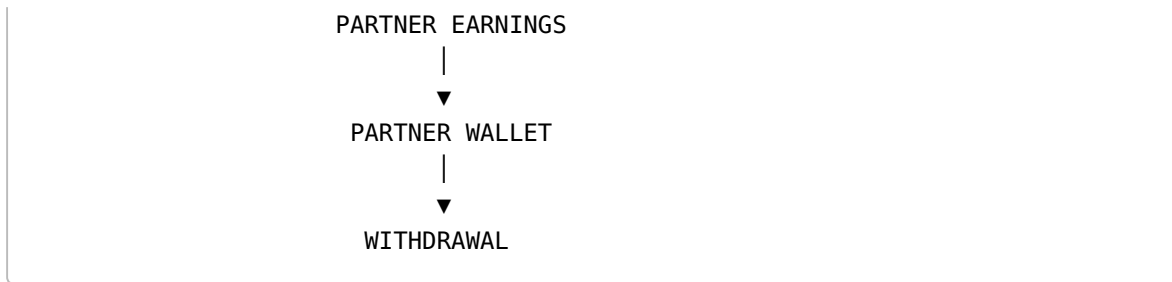

The Admin should configure penalty rules instead of hardcoding them.

Rule 9: Every Financial Activity Must Be Recorded

All money movement must create a transaction record.

36. COMPLETE SYSTEM FLOW

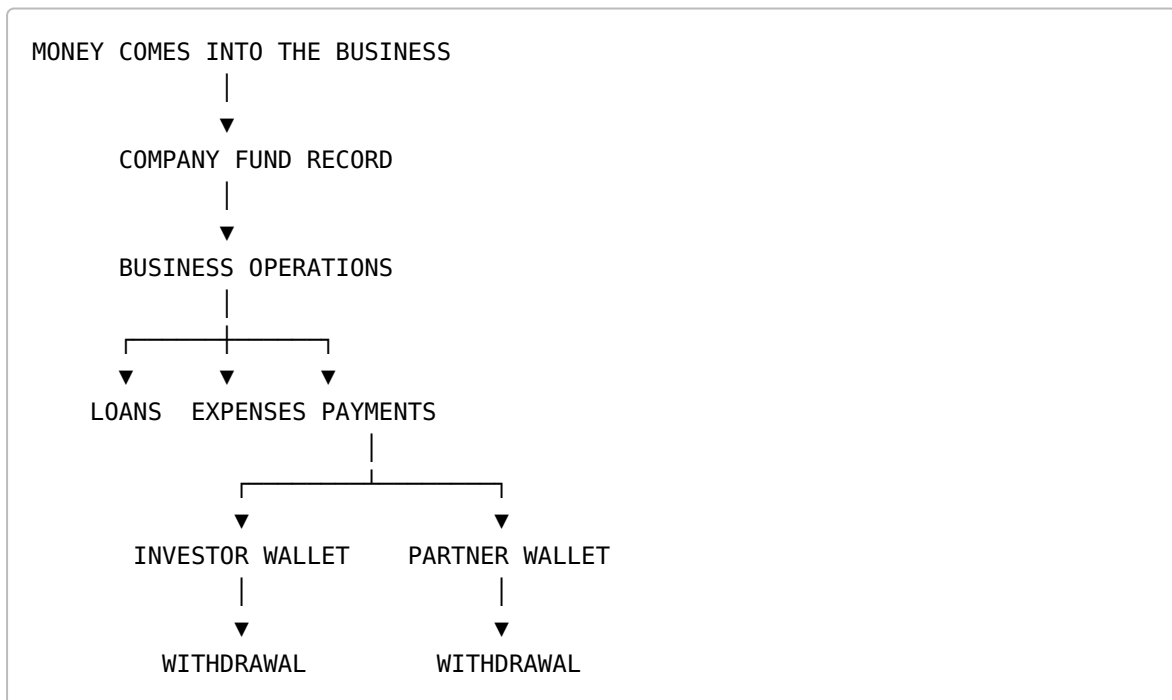

37. FINAL PROJECT SUMMARY

Punnaigai Finances is a complete role-based financial management system consisting of an Admin Web Panel and a Mobile Application.

The system manages the complete financial lifecycle:

Company Incoming Money

- Investor Investments
- Partner Contributions
- Customer Collections
- Other Business Income

Company Outgoing Money

- Customer Loan Disbursements
- Business Expenses
- Investor Payments
- Partner Earnings

- Approved Withdrawals

Investor Wallet

Incoming:

- Periodic payments
- Approved wallet credits

Outgoing:

- Completed withdrawals

Partner Wallet

Incoming:

- Approved business earnings
- Other approved credits

Outgoing:

- Completed withdrawals

Mobile Application Roles

- Customer
- Agent
- Investor
- Partner

Each role has its own dashboard, navigation, permissions, and screens.

This documentation provides the complete functional structure required for:

- UI/UX Design
- Admin Panel Development
- React Native Mobile App Development
- Backend API Development
- Database Design
- Wallet Calculation Logic
- Financial Transaction Management
- Role-Based Authentication
- Reports and Analytics

The core principle of the Punnaigai Finances system is that every incoming and outgoing financial movement must be transparent, properly recorded, and traceable through a transaction history.
